

TIMBER DOORS

HS lift-and-slide doors

Lift-and-slide doors with moving and fixed sections in different planes. Turning the handle releases the leaf so it can slide sideways. Doors can be closed from inside or outside, and the aluminium threshold can be recessed into the floor. The source states dimensions up to 3.2 m high and 2 m wide; dimensions for each structure are confirmed for the project.

Construction features

System	Lift-and-slide (HS)
Threshold	Aluminium, can be recessed into the floor
Operation	From inside and outside
Dimensions stated in the source	Up to 3,2 m high and 2 m wide; confirmed for each project

Selecting the specification

Timber, glazing, hardware and final dimensions are selected to suit the opening and usage requirements. Thermal and acoustic values are confirmed for the specific structure.
