Bespoke products

Bespoke solutions

Arched windows, distinctive shapes and structures tailored to the individual building.

Product overview

Shapes	Assessed from drawings
Materials	Selected individually
Design	According to project requirements

Available dimensions, glazing, thermal performance and warranty terms are confirmed for the selected system and specification.

Specification

Materials, colours, glazing units, hardware and opening configurations are agreed individually. We consider the architecture, operating conditions and technical requirements of the project.

For an initial assessment, provide opening dimensions or drawings, quantities and the project location.
