

TIMBER DOORS

PSK / Patio sliding doors

The PSK / Patio system suits standard or smaller openings and more frequent closing from inside. Special hardware moves the leaf out of the frame plane and along rails. An 80 mm timber bottom frame is required and cannot be recessed into the floor.

Construction features

System	PSK / Patio
Application	Standard and smaller openings
Bottom frame	80 mm timber frame, cannot be recessed into the floor
Operation	Recommended for more frequent closing from inside

Selecting the specification

Timber, glazing, hardware and final dimensions are selected to suit the opening and usage requirements. Thermal and acoustic values are confirmed for the specific structure.
